Case study details

Client need

The client required technical and project management support to scope and develop collaborative research on the development of a sustainable resilient economy. This included qualitative research through the delivery of workshops to scope the next steps to producing a research based piece of work.

The challenge

- Managing and helping to scope a project across a number of research partners.
- Organising workshops with multiple stakeholder groups.
- Providing materials, logistics and engagement support.

Outputs and results

- ✓ Workshops with research partners to define the terms and boundaries for the client's next research based thought leadership work.
- ✓ Creation of a research scope document.
- ✓ Project management plans.

What happened next

The project went on to produce an industry-based thought leadership paper released in 2018.
