Case study details

Client need

The client required support to undertake qualitative research on the barriers to investment in green infrastructure as part of a wider research team. The client wanted the outputs of the work to feed into a funding proposal.

The challenge

- Review and input into questionnaire design and identifying experts to take part in interviews for the project.
- Reviewing and providing inputs to a report on funding for work to better understand how to improve investment in green infrastructure.

Outputs and results

- ✓ Conducting interviews and providing interview write-ups to the wider research team.
- ✓ Report for the client's funder who was looking to understand how to improve investment in green infrastructure.

What happened next

The report from this work was shared with the client's funders as part of their natural capital workstream.
