Case study details

Client need

The client required technical support to review an impact valuation of changing levels of deforestation in eight countries across Africa and Asia.

The economic model was reviewed and recommendations developed to improve the model.

The challenge

- Data availability for the eight countries under review.
- Understanding the complex model and providing challenge to the assumptions and data sources used.

Outputs and results

Review of the environmental economic model.

Question log seeking clarification on model development and assumptions.

Proposed improvements and options for future development of the model.

What happened next

The peer review fed into the development of the client's wider project.
